

Hull JSNA Local Practice Profile – Version 1, October 2011

These profiles have been developed by the Public Health Sciences team at NHS Hull in order to support GPs and the emerging Hull Health Commissioning Alliance in their understanding of the demographics of their population and to consider their outcomes against similar GP practices and the whole consortia, via the use of locally available information.

This is a first draft and is not a full list of primary care information; there is scope for adding or removing sections depending on relevant feedback from users.

If you do wish to comment on these profiles, or have any queries regarding their content or use, please use the following contacts at NHS Hull:

h-pct.hullpublichealthsciences@nhs.net or derek.cooper1@nhs.net
